

 ChatGPT 

 

I've got the exact URL now, so I'm checking the repository directly.

Received app response ▾

Found it: anarchogre/ADE-Working-Repository- is a public repo, on main .

What do you want me to do next in it—list files, inspect a branch, or summarize the repo contents?

@GitHublist files

I'm listing the repository contents now.

The fetch endpoint needs a file URL, so I'm switching to the repository listing endpoint instead.

```

I hit a connector limitation while trying to enumerate the repo contents. The repo itself is confirmed, but the listing actions I tried did not return the directory tree.

The cleanest next step is to fetch a specific path, like `README.md`, `package.json`, or a folder path you care about, and I'll work outward from there.

Here's the file content from `CODE_OF_CONDUCT.md` :

ADE Code of Conduct

This repository values:

- Respect
- Evidence-based discussion
- Clear documentation
- Long-term preservation
- Constructive collaboration

Disagreements should improve understanding, not reduce it.
